Usuń stare skrypty SQL

Odkomentuj konfigurację z pliku application.properties z projektu westeros-data

Uruchom maina z WesterosDataApplication

```
@SpringBootApplication
public class WesterosDataApplication implements CommandLineRunner {

    4 usages
    private final ICatalogData dataCatalog;

    ** adam urbanowicz
    public WesterosDataApplication(ICatalogData dataCatalog) { this.dataCatalog = dataCatalog; }

    Run WesterosDataApplicat...'
    ** Run WesterosDataApplicat...'
    ** Ctrl+Shift+F10
    ** Debug WesterosDataApplicat...'
    ** Run WesterosDataApplicat...'
    ** Run WesterosDataApplicat...' with Coyerage
    ** Profile WesterosDataApplicat...' with 'IntelliJ Profiler'
    ** Modify Run Configuration...
    ** throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
    ** Throws Exception {
        var company = new company();
        var company = new company();
        var company();
```

Projekt może rzucić błędem – nie przejmować się tym.

Nowe skrypty do tworzenia tabelek powinny się wygenerować.
